

# Procedure - Retorna último dia do mês

## SQL:

```
create or alter procedure ULTIMODIAMES (MES integer, ANO integer) returns (ULTIMO_DIA
smallint) as
    declare variable VPROXMES integer;
    declare variable DATA date;
begin
    if (:mes is null) then
        mes=EXTRACT(month FROM CURRENT_DATE);

    if (:ano is null) then
        ano=EXTRACT( YEAR FROM CURRENT_DATE);

    vproxmes = :mes+1;

    if (:mes=12) then
        begin
            ano= :ano+1;
            vproxmes = 1;
        end

    DATA = '01.' || :vproxmes || '.' || ANO;
    ultimo_dia = EXTRACT(DAY FROM (CAST(DATA AS DATE)-1));
    suspend;
end
```

## Chamada da procedure:

```
SELECT *
FROM ULTIMODIAMES( 07, 2019)
```

## Retorno:
