

Função - Converter CLOB para BLOB

SQL:

```
create or replace function clob_to_blob(l_clob clob) return blob is
    l_blob          blob;
    l_dest_offset    number := 1;
    l_src_offset     number := 1;
    l_lang_context    number := dbms_lob.default_lang_ctx;
    l_warning         number;
begin
    dbms_lob.createtemporary(l_blob, true);
    dbms_lob.converttoblob(dest_lob      => l_blob,
                           src_clob      => l_clob,
                           amount        => dbms_lob.lobmaxsize,
                           dest_offset    => l_dest_offset,
                           src_offset     => l_src_offset,
                           blob_csid     => nls_charset_id('al32utf8'),
                           lang_context   => l_lang_context,
                           warning        => l_warning);

    return l_blob;
end clob_to_blob;
```

Chamada da função:

```
select clob_to_blob(' Teste' ) from dual
```

Retorno:

```
( BLOB)
```
